

Virtual Summer Camp Themes 2020

Register at CampsAtTheDurham.org

Around the World

Can you travel around the globe in only five days? You can at The Durham Museum! We will "visit" all seven continents and five oceans exploring cultures, landmarks and much more. Get ready to set sail for adventure!

Brain Busters

Put on your thinking caps and join us for a brain-busting week! Campers will learn how their brains can solve tricky puzzles and put their minds to work during this mind-bending camp.

Bringing Books to Life

Have you ever wished you could bring your favorite stories to life? Join us during this picture-perfect week of camp. We'll bring out all of our favorite fairytales, fables and modern picture books and celebrate them with crafts, games and even some of our own storytelling.

Camp Celebration

What's your favorite holiday? We bet it will be part of the line-up for our Camp Celebration week! We'll travel through an entire calendar year of holidays and celebrations from around the world, celebrating everything from Valentine's Day to National Pet Day.

Camp Construction **NEW SPECIALTY THEME**

Put on your tool belt and get ready to learn about the fascinating world of architecture, engineering and construction! Local companies Boyd Jones, BVH Architecture and Alvine Engineering will help us explore how buildings get designed, engineered and built through fun, hands-on activities.

Creation Station

From the stage to the recording studio and architecture to fashion, explore popular forms of art and creation from today and centuries past. Use pencils, brushes and fabrics to create memorable projects and pick up a few new skills along the way.

CSI Durham

It takes a skilled investigator to crack the toughest cases, but we think you're up for the task! This camp will include everything from history's greatest detectives and spies, to modern fingerprinting and investigative techniques.

Dive to the Ocean Floor

Travel to the greatest depths on earth during this ocean-themed camp. While the younger campers are "shooting for the stars" in outer space, our older group will dive deep into ocean life, exploring everything from animal and plant life to shipwrecks and ocean lore.

Durham Olympics

Go for the gold as we host The Durham Olympics! Explore the history, games, and traditions of the Olympic Games, and create versions you can try at home!

Full S.T.E.A.M. Ahead

No, this isn't a train themed camp! S.T.E.A.M. (Science, Technology, Engineering, Art and Math) week will feature one letter of this popular acronym each day of the week. Crafts, games, projects and more will get you ready for "back to school" time during our final week of camp.

Heroes in Training

Soar into the world of superheroes (fictional and real-life) during this jam-packed week of camp adventures. Not only will you train to be a superhero, but you'll meet real-life heroes from our community for inspiration!

Inventors and Innovators

History is full of inventors and innovators who have paved the way for today's modern visionaries. It's your turn to be one of them during this revolutionary week at camp.

Myths and Legends

The Loch Ness Monster? Swash-Buckling Pirates? Kings and Queens from distant lands? We'll dive deep into the stories surrounding these characters, both real and fictional, during this mythical week at camp.

Nature Exposed

Tornados, earthquakes and blizzards, oh my! Explore these natural disasters, along with how they affect the world of animals, plants, our earth and of course, humans.

Our Five Senses

Did you know flies and butterflies taste using receptors on their feet? Or that humans can smell around 10,000 different smells? Explore your senses (and the senses of other living creatures) with activities and experiments, and put your senses to the test!

Ready, Set, Go!

Start your engines! Whether by boat, train or plane, campers in "Ready, Set, Go!" will cruise through the week while discovering all things transportation. From hot air balloons to bicycles, we'll see it all during this week of camp.

Science Matters

Science plays an important role in our everyday lives! Each day of this camp will feature activities related to a different branch of science including chemistry, meteorology, astronomy and zoology.

Shoot for the Stars

Planets, moons, stars and much more await young astronauts as they shoot for the stars during our space-themed camp. Crafts, games and science experiments will help us explore outer space and what scientists have learned about our galaxy.

Sound Scientists

Join us for this summer camp of sound at The Durham Museum. We will experiment with sounds all around us, including the unique sounds of our own building, Omaha's (very echoey) Union Station, and the sounds you may find in your own home.

Time Travelers

What was it like to live "back in the day?" Travel to Ancient Egypt, the crazy 80s, and everything in between.

Unsolved Mysteries at the Museum

History is full of mysteries! This camp will explore some of the greatest mysteries of all time, while campers learn what it takes to be a true historian.

Wild Thing

Get Wild! Discover the wildest animals of the world through games, crafts, and stories.

Wild, Wild West

Giddy up for a wild week of cowgirl and cowboy adventures! The Wild West was full of characters, challenges and teamwork. Campers will find out how the west was won during this week of camp.

Wizard Academy **SPECIALTY THEME**

Pack your trunk! Our 3rd annual "back to school" camp will feature a full-week, full-day camp celebrating the wizard world! Join us for the sorting hat ceremony on Monday, the awards ceremony on Friday and enjoy the adventures in between!
